

Diaphragm Valve, Metal

Construction

The GEMÜ 650 piston actuated 2/2-way diaphragm valve is designed for use in sterile areas of application.

All metallic actuator components are made of stainless steel. Normally closed, Normally open and Double acting control functions are available. The valve is available with two actuator versions: Design D has concealed bolt mounting in the actuator and is only suitable for 2/2-way bodies. Design T is suitable for T valve, Multi-port valve, Tank bottom valve and 2/2-way valve bodies. The valve has an optical position indicator as standard.

Features

- Suitable for inert, corrosive*, liquid and gaseous media
- Valve body and diaphragm available in various materials and designs
- Compact design (ideal when space is at a premium)
- Various connections available
- CIP/SIP cleaning and sterilizing capabilities
- Autoclave capability, dependent on version
- Versions according to ATEX on request

Advantages

- Hermetic separation between medium and actuator
- Optional flow direction
- Optional mounting position
- Design D for the 2/2-way version is mounted by means of female threads in the actuator
- Control air connectors positioned in-line with piping
- Expelled air from spring chamber can optionally be piped to other locations
- Extensive range of accessories, easily retrofitted

*see information on working medium on page 2

Sectional drawing

Technical data

Working medium	
Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the body and diaphragm material.	
The valve will seal in both flow directions up to full operating pressure (gauge pressure).	
Max. operating temperature (dependent on medium wetted materials)	150° C
Ambient conditions	
Max. ambient temperature	60° C

Control medium		
Inert gases		
Max. perm. temperature of control medium		70° C
Actuator size	Piston diameter	Filling volume
OT1	32 mm	0.009 dm ³
OTA	40 mm	0.012 dm ³
1	50 mm	0.031 dm ³
2	80 mm	0.124 dm ³
3	100 mm	0.230 dm ³
4	130 mm	0.493 dm ³

Actuator Code	MG	DN	Operating pressure [bar]		Control pressure [bar]		Weight [g]

All pressures are gauge pressures. Operating pressure values were determined with static operating pressure applied on one side of a closed valve. Sealing at the valve seat and atmospheric sealing is ensured for the given values.
Information on operating pressures applied on both sides and for high purity media on request. MG = diaphragm size
